What Teacher's say about the "Teacher's Conservation Workshop"

"This was one of the best workshops I have ever attended. I obtained a wealth of knowledge that I could carry back to the classroom and begin to use immediately. I found this workshop to be stimulating, practical and full of information that is applicable to my specific needs as a teacher."

Debra Ly nne Rogers
Michle, TN

"Teachers work hard all year to motivate students. In turn, we need motivation. For me, this came in the form of the Teacher's Conservation Workshop. Nature is always a magnet for my Pre-K classes. This workshop has inspired me to coordinate hands-on programs all year. My own family has to continually tell me "keep my eyes on the road" because I just can't stop looking at the trees."

Pamela Bowker
Franklin, TN

2008 Teacher Conservation Workshop Registration Form

Please complete the information and return with your \$25.00 Reservation Fee to:

Tennessee Forestry Association
Teacher's Conservation Workshop
PO Box 290693
Nashville, TN 37214

A Workshop Designed to Emphasize Forestry and Natural Resources

Environmental Conservation is important to everyone. Learn about the latest techniques in forest management and hands-on exercises for today's conservation practices you can take

to the classroom. From the forest to the product, learn about Tennessee's wood-using industries and the care taken to ensure sustainable forests.

This Workshop explores economic links between natural resource management and stewardship. Learn to identify trees and determine their age. Distinguish soil types and examine the aquatic life in a stream. Become certified in the nation's leading environmental education program Project Learning Tree.

Relax, trade secrets, share experiences, and have fun!

From the classroom, through the forest, to the streams..... You will leave with a carload of teaching materials to use in the classroom. This fun-filled, adventure-packed workshop is one you can't afford to miss.

Fees, Scholarships & Enrollment

Please join us for the 10th Annual Teacher's Conservation Workshop. Workshops are conducted at the University of Tennessee, Knoxville and Pickwick Landing State Park, Pickwick Dam. Lodging, meals and transportation during the class are provided. The class is free to participants, however a \$25.00 reservation fee is required. This fee is refundable **only** upon completion of the course. Checks or Money
