Department of Forestry,
Wildlife & Fisheries
University of Tennessee

Dr. Allan Houston, Research Professor

Ames Plantation

What Teacher's Are Saying About the "Teacher's Conservation Workshop"

"This was one of the best workshops I have ever attended. I obtained a wealth of knowledge that I could carry back to the classroom and begin to use immediately. I found this workshop to be stimulating, practical and full of information that is applicable to my specific needs as a teacher."

Debra Lynne Rogers
Michie, TN

"I've learned so much this week. It's very inspiring to be around, witness, and learn from people who know so much about our forests and who have or continue to work with the forest in all different aspects from loggers, to mill workers, to private landowners, and educators. Thank you so much for passing on the knowledge! I'll be sure to pass it on to the teens of the world! I have a new found respect for the practice of forestry."

Vanessa Lazon
Nashville, TN

A WORKSHOP DESIGNED TO EMPHASIZE FORESTRY & NATURAL RESOURCES

Environmental conservation involves the wise stewardship of natural resources. You will study forest conservation through hands-on examples that can be incorporated into your classroom instruction. Learn about the importance of wood in our daily lives.

The workshop explores the biological, social, and economic inter-relationships associated with the conservation and management of forest resources. Learn to identify trees and determine their age. Examine the aquatic life in a stream. Discover the "Woods Walk, Woods Talk" interpretive program. Visit wood processing facilities. Become skilled in the nation's leading environmental education program, Project Learning Tree.

Relax, trade professional secrets, share experiences and have fun!

Forests are a renewable and sustainable natural resource. You will leave with a wealth of teaching materials and knowledge about forests to use in the classroom. This science-based, adventure-packed and fun-filled workshop is one you cannot afford to miss.

FEES & ENROLLMENT

Please join us for the 22nd Annual Teacher's Conservation Workshop. This workshop is conducted at Pickwick Landing State Park, Pickwick Dam. Lodging, meals and transportation during the class are provided. The class is free to participants, however a \$25.00 reservation fee is required.

This fee is refundable only upon completion of the course. Checks or Money Orders accepted. Space is limited, so please register early.

Complete and return the attached registration form and include your \$25.00 reservation fee to:

Cancellations must be received 21 days before the workshop.
